Invatig Pulsetig AC DC Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Weight	Approx. 60-90 kg (Model dependent)
Input Current	Varies as per selected output (Typically 32-45A)
Dimension (L*W*H)	Approx. 630 x 350 x 730 mm (Model dependent)
Function	AC/DC TIG, Pulsed TIG, MMA/Stick Welding
Insulation Grade	H
Cooling Method	Forced Air (Fan Cooled)
Condition	New
Arc Current	Adjustable up to 400A (Depending on model)
Output Current	20A-400A (Varies by model)
Usage	Metal Welding (Suitable for Steel, Aluminium, Stainless Steel, etc.)
Type	Pulsetig AC DC Welding Machine
Rod Diameter	1.6 mm-5.0 mm (MMA)
Frequency	50/60 Hz
Efficiency	85% (Typical for inverter welding machines)
Voltage	415V (3 Phase)
Pulse Frequency	0.5~500 Hz (Depending on settings)
Welding Area	Industrial/Workshop/Fabrication
Motor Type	Digital Controlled
Power	3 Phase
Material	Metal Body with Polycarbonate Control Panel
Display Type	Digital, with Rotary Controls

Parameter	Value
Ignition Type	HF (High Frequency) Start for TIG
Welding Technology	IGBT Inverter
Ingress Protection (IP) Rating	IP21S
No Load Voltage	70V-80V
Pre Gas Setting	0-2 sec (Adjustable)
Torch Cooling Option	Provision for Water/ Air cooling
Output Indicator	LED Display
Duty Cycle	60% at 400A (Typical)
Post Gas Setting	0-15 sec (Adjustable)
Current Adjustment Range	20-400A

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Discover the spectacular Invatig Pulsetig AC DC Welding Machine, offering the lowest price for peerless quality in advanced welding technology. Highlighted by its IP21S ingress protection, this special machine delivers excellent performance using IGBT inverter technology with a digital display and rotary controls. The machine provides a 60% duty cycle at 400A, ensuring efficiency for demanding industrial, workshop, and fabrication tasks. Benefit from HF start for TIG, adjustable post and pre gas settings, and both air/water torch cooling options. This all-in-one solution is suitable for welding a variety of metals including steel, aluminium, and stainless steel.

Versatile Applications & Robust Construction

Invatig Pulsetig AC DC Welding Machine is engineered for industrial, workshop, and fabrication environments. Its durable metal body and polycarbonate control panel provide resilience in challenging conditions. Highlighting versatility, this machine is suitable for welding steel, aluminium, and stainless steel, making it ideal for various metalworking sectors. With advanced AC/DC TIG, pulsed TIG, and MMA functionalities, users benefit from precision control, adjustable arc current, and a wide range of rod diameters to suit diverse applications.

Mogora 24KD MIG Welding Torch

Category: MIG Welding Torch | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Power Source	Gas Cooled
Equipment Type	MIG Welding Torch
Welding	MIG
Current Range	250 Amps
Application	Industrial welding
Type	Welding torch
Condition	New
Motor Type	Manual
Material	SS
Power	250Amps
Usage	Heavy Duty
Fuel Gas Type	LPG
Flexible Cable	Included
Model Number	24KD
Connector Type	Quick Connect
Handle Color	Red
Duty Cycle	60%
Cooling Source	Gas Cooled
Export Quality	Yes

Trade Information

Minimum Order Quantity	1 Unit
------------------------	--------

Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Discover the Mogora 24KD MIG Welding Torch, a crowning achievement for heavy-duty industrial welding. This first-rate torch offers a 60% duty cycle and operates at a robust 250 Amps, driven by reliable gas cooling. Its quick connect and flexible cable empower effortless setup, while the vibrant red handle ensures ergonomic comfort. Made from premium SS, fueled by LPG, and highly recommended for export, it's the preferred choice for professionals who select only the best. An astonishing offer for those seeking top-tier, durable equipment.

Diverse Industrial Applications of Mogora 24KD

The Mogora 24KD MIG Welding Torch is widely utilized in industrial fabrication shops, automotive repair units, and large-scale manufacturing hubs. Its area of application extends across construction sites, shipyards, and metalworking industries in India and abroad. With unmatched reliability, this torch is specifically designed for heavy-duty welding tasks, making it an indispensable asset in workplaces where consistent performance and efficiency are required for diverse, rigorous welding operations.

Mogora Inva 400P Digital TIG Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Weight	45Kg
Condition	New
Output Current	400Amps
Arc Current	400A
Frequency	50Hz
Cooling Method	Fan Cooled
Type	Digital TIG Welding Machine
Welding Area	Industrial/Workshop
Usage	TIG Welding
Dimension (L*W*H)	670*370*650mm
Function	TIG Welding with Pulse
Material	Metal Casing
Protection Class	IP23
Front Control Panel	Digital Display
Model Number	Inva TIG 400P
Output Type	DC/CC/HF
Color	Blue
Phase	Three Phase
Welding Cable Length	Long Reach
Application	Metal Fabrication
Torch Included	Yes
Portable Design	Wheels with Handle

Parameter	Value
Open Circuit Voltage	75V
Input Type	3 Phase

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Discover the Mogora Inva 400P Digital TIG Welding Machine-a polished solution crafted for industrial and workshop needs. Highlighted by its reliable performance, this classic machine operates at a robust 400A arc current and runs on a three-phase input, ensuring sterling results for metal fabrication. Select this portable design, engineered with wheels and handle for effortless movement. Enjoy the lowest price for a quality machine that features a digital front control panel, long-reach welding cable, and a durable blue metal casing, making it a top choice for professionals across India.

Primary Advantages, Usage & Application

The Mogora Inva 400P Digital TIG Welding Machine excels in versatility and efficiency, featuring digital controls and a user-friendly design. Engineered for TIG welding with pulse, it suits a variety of metal fabrication tasks in industrial and workshop settings. With easy-to-operate digital displays and long welding cable, users enjoy enhanced flexibility and precision. As a three-phase, DC/CC/HF output machine, its durable build and portable handling make it a preferred choice for consistent, high-quality performance in demanding environments.

Mogora Inva ARC MIG 400 Welding Machine

Category: MIG Welding Machines | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Weight	54Kg
Output Current	400 Amp
Power	3PH
Frequency	50/60 Hz
Cooling Method	Fan Cooling
Condition	New
Pulse Frequency	Adjustable
Arc Current	400 Amp
Input Current	Rated 17.5 KVA
Type	Inva ARC MIG Welding Machine
Dimension (L*W*H)	645*290*600mm
Function	Welding
Voltage	415V
Efficiency	High
Rod Diameter	Upto 5.0 mm
Motor Type	Built-in Fan Cooled
Welding Area	Industrial/Workshop
Usage	MIG and ARC Welding
Insulation Grade	H
Material	Metal Body
Accessory Support	Multi-Connector
Ventilation	Side vents

Parameter	Value
Display Type	Digital
Input Supply	AC
Welding Technology	Inverter Based
Protection Class	IP23
Phase	Three Phase
Control Mode	Manual knobs
Portable	Yes, with handles
Mobility	Hand-carry
Color	Blue

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

The Mogora Inva ARC MIG 400 Welding Machine stands as a grandiose and potent solution for top-ranking industrial and workshop applications. Highlighted by its digital display and manual knob control mode, this advanced, inverter-based equipment ensures high efficiency and powerful arc currents up to 400 Amp. Reserve yours now for a superior welding experience supported by IP23 class protection and robust side-vented cooling. With multi-connector support, portability via handles, and a sleek blue metal body, this premium machine is a must-have for discerning professionals seeking reliability, versatility, and safe operation.

Highlighted Features, Usage & Applications

The Mogora Inva ARC MIG 400 Welding Machine boasts extra features such as a robust fan-cooled motor, adjustable pulse frequency, and multi-connector accessory support-perfect for varied welding rods up to 5.0 mm. Its grand design and digital interface make it ideal for industrial workshops, heavy-duty repairs, and fabrication projects. This powerful, portable unit is well-suited for both MIG and ARC welding, ensuring versatility across multiple professional use cases with consistently efficient performance.

Mogora Inva ARC MIG 500 Welding Machine

Category: MIG Welding Machines | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Pulse Frequency	Adjustable
Motor Type	Induction Motor
Power	3PH
Frequency	50/60 Hz
Rod Diameter	Upto 6mm
Input Current	23.5KVA
Type	ARC MIG Welding Machine
Voltage	415V
Function	Metal Joining
Usage	MIG and ARC Welding
Output Current	500 Amp
Dimension (L*W*H)	750*430*740mm
Condition	New
Welding Area	Heavy Industrial Use
Arc Current	500 Amp
Weight	85Kg
Cooling Method	Fan Cooled
Insulation Grade	H
Efficiency	High
Material	Metal Enclosure
Input Supply Phase	Three phase
Wire Feeder	Integrated

Parameter	Value
Front Panel	Multi-knob Adjustment
Display Type	Analog Controls
Protection Class	IP23
Portability	Handle Equipped
Color	Blue
Duty Cycle	High
Rated Input KVA	23.5KVA

Trade Information

Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Jump on the latest in welding technology with the Mogora Inva ARC MIG 500, a noteworthy machine designed for heavy industrial applications. Sporting a reduced input KVA of 23.5 and sublime efficiency, this towering ARC MIG welding system is equipped with analog controls, integrated wire feeder, and multi-knob adjustment for precise metal joining. Its high duty cycle and adjustable pulse frequency ensure superior, consistent performance. Handle-equipped portability and robust metal enclosure make it a dependable choice for large-scale operations in demanding settings.

Enhanced Versatility for Heavy Industrial Welding

The Mogora Inva ARC MIG 500 Welding Machine is suitable for intensive industrial use, delivering optimal results in various sectors such as fabrication, construction, and manufacturing. Its versatile design supports both MIG and ARC welding, making it ideal for professionals handling extensive welding projects. With a high arc current capability and adjustable settings, it provides reliability and efficiency for those requiring precision and power in demanding environments.

Mogora Inva Saw 1200 Submerged Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Dimension (L*W*H)	780*390*800mm
Condition	New
Frequency	50 Hz
Output Current	1200A
Usage	Heavy Industrial Welding
Voltage	415V
Arc Current	1200A
Type	Submerged Arc Welding Machine
Cooling Method	Air Cooled
Rod Diameter	3.2mm
Function	Automatic Welding
Weight	125Kg
Material	Rugged Steel Body
No Load Voltage	90VDC
Phase	Three Phase
Control Panel	Front Mounted
Mobility	Wheeled Base
Display Type	Digital Meter
Environment	Indoor Use
Color	Blue

Parameter	Value
Service	Continuous Duty Cycle

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Experience instant savings when you buy the Valiant Mogora Inva Saw 1200 Submerged Arc Welding Machine, designed for flawless, first-string heavy industrial welding tasks. This automatic welding machine features a digital meter, air-cooled system, and robust 415V three-phase operation, ensuring relentless performance even in demanding environments. Its blue wheeled base enables easy mobility, while the front-mounted control panel provides intuitive operation. Buy online from leading suppliers and traders across India for a rugged steel-bodied solution, ideal for continuous duty cycles and flawless welds. Elevate your welding experience today!

Versatile Usage & Features for Industrial Excellence

The Mogora Inva Saw 1200 Submerged Welding Machine is perfect for heavy industry applications, such as manufacturing plants, fabrication workshops, and shipyards. Its 1200A arc current ensures exceptional welding of thick metals. With user-friendly digital controls, a first-string rugged steel body, and air cooling, it excels in continuous indoor operations. Compatible with 3.2mm rods, this equipment is suitable for experts seeking flawless, robust welds and consistent, long-term service in professional settings.

Mogora Inva Saw 800 Inverter Controlled Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Weight	90Kg
Arc Current	64A
Usage	Industrial Welding
Condition	New
Output Current	250 Amp
Voltage	90VDC (No Load)
Input Current	800A
Dimension (L*W*H)	680*320*630mm
Insulation Grade	H
Function	Automatic Welding
Type	Inverter Controlled Welding Machine
Phase	3 Phase
Portable	Wheeled Design
Build Quality	Heavy Duty
Panel Display	Digital Display
Color	Blue Finish
Control Panel	Knob Adjustments
Application	Submerged Arc Welding

Trade Information

Minimum Order Quantity	1 Unit
------------------------	--------

Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Personalise your industrial workspace with the Mogora Inva Saw 800 Inverter Controlled Welding Machine-our preeminent, best-seller for demanding welding operations. Built with a valiant heavy-duty frame and finished in striking blue, its wheeled, portable design makes both setup and mobility seamless. The crowning feature-a digital display with intuitive knob controls-delivers exactitude in every use. Jump on the advantage of automatic, inverter-regulated submerged arc welding, ensuring professional results backed by phase-three power and supreme, insulated safety. Elevate your production with this champion of the trade.

Unmatched Versatility & Superior Features

The Mogora Inva Saw 800 excels beyond submerged arc welding, suitable for a range of heavy industrial applications. Its extra features-a digital panel, robust H-grade insulation, and precise knob adjustments-empower users with flawless operation and safety. Advantages include consistent arc stability, reduced energy consumption owing to inverter control, and effortless handling thanks to its portable wheeled setup. Ideal for large manufacturing units, steel plants, and complex fabrication environments, this machine ensures top-tier performance.

Mogora MIG 250 Welding Machine

Category: MIG Welding Machines | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Power	11.2 KVA
Efficiency	High efficiency
Function	Welding
Frequency	50/60 Hz
Usage	Metal Inert Gas (MIG) welding
Input Current	3 Phase
Dimension (L*W*H)	660*570*720 mm
Output Current	250 Amp
Welding Area	Industrial Applications
Arc Current	250 Amp
Condition	New
Cooling Method	Air cooled
Weight	105 Kg
Type	MIG Welding Machine
Motor Type	Electric
Insulation Grade	Class H
Voltage	415V
Material	Metal
Rated Input KVA	11.2KVA
Portable Design	Yes
Service Required	Low
Input Supply	3PH

Parameter	Value
Wire Feeder Included	Yes
Protection Class	IP23
Heavy Duty Wheels	Yes
Display Panel	Integrated
Handle	Top mounted
Color	Blue

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Introducing the astonishing Mogora MIG 250 Welding Machine, a new release that's taking the industrial welding sector by storm. This world-class device is designed for high efficiency with a rated input of 11.2KVA, an output current of 250 Amp, and robust heavy-duty wheels for effortless mobility across worksites. Its integrated display panel, lustrous blue build, and top-mounted handle make it both stylish and portable. With limited stock available and in demand nationwide, experience professional-grade, low-maintenance MIG welding with advanced IP23 protection and exceptional durability.

Versatile Application for Industrial Excellence

The Mogora MIG 250 Welding Machine excels on a variety of application surfaces, including steel, stainless steel, and other conductive metals. It is primarily intended for industrial environments but adapts well to large-scale fabrication, construction, and repair work. The machine employs the Metal Inert Gas (MIG) application method, ensuring precision and superior weld quality every time. Fast and reliable, it provides seamless welding results across numerous heavy-duty projects, setting an impressive benchmark for professional welders.

Mogora MLW 1500 Laser Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Function	Handheld Laser Welding
Condition	New
Dimension (L*W*H)	980*550*800mm
Cooling Method	Water Cooled
Efficiency	High
Power	1500W
Type	Laser Welding Machine
Usage	Metal Welding
Portable Design	Wheeled
Model Number	MLW 1500
Control Panel	Digital
Handheld Operation	Yes
Protective Glass	Nitrogen
Body Color	Blue/Black
Input Power	8.2kW
Laser Source	Fiber Laser
Automation Grade	Semi Automatic
Application	Industrial Welding

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)

Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Experience fresh advancements in industrial welding with the Mogora MLW 1500 Laser Welding Machine, crafted for stellar performance and cost-effective durability. Boasting unparalleled efficiency, this semi-automatic model operates with a powerful 1500W fiber laser and delivers excellent results on various metals. Equipped with a digital control panel, nitrogen-protected glass, and a water-cooled system, it ensures impeccable precision. Its portable, wheeled design guarantees ephemeral setup times and seamless mobility- making it an outstanding choice for traders and suppliers seeking reliable solutions in India.

Advantages and Features of Mogora MLW 1500

The Mogora MLW 1500 Laser Welding Machine stands out with its stellar performance and fresh technology integration. Featuring efficient handheld operation, high-power fiber laser, and a digital control panel, this machine is ideal for precise metal welding. The portable, water-cooled system minimizes downtime, while nitrogen-protective glass enhances welding quality. Perfect for industrial usage, its cost-effective and ephemeral setup suits both small workshops and expansive manufacturing plants, delivering reliable results every time.

Mogora Pulse MIG 500 DP Inverter Controlled Welding Machine

Category: MIG Welding Machines | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Rod Diameter	Up to 5mm
Insulation Grade	H
Usage	Metal Fabrication, Repair
Welding Area	Industrial/Workshop
Condition	New
Arc Current	500 Amp
Efficiency	High Efficiency
Power	3PH, 23KVA
Weight	85Kg
Pulse Frequency	Adjustable
Cooling Method	Fan Cooled
Input Current	Three Phase
Voltage	415V
Dimension (L*W*H)	750*350*900mm
Motor Type	DC Motor
Frequency	50/60Hz
Type	Pulse MIG Inverter Welding Machine
Function	Pulse & MIG Welding
Output Current	500 Amp
Material	Steel Housing

Parameter	Value
Gas Type	CO2/Argon
Wire Feeder	Separate Unit
Color	Red/Black
Protection Class	IP23
Input Voltage Range	380-440V
Cable Length	Standard
Application	Automobile, Fabrication
Panel Type	Digital Controls
Mobility	Wheel Mounted
Safety Features	Overload Protection
Torch Compatibility	Yes
Digital Display	Included
Duty Cycle	High

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Capitalise on unrivaled performance and imposing reliability with the Mogora Pulse MIG 500 DP Inverter Controlled Welding Machine. Famed for its top-rated efficiency and high-duty cycle, this clearance unit is perfect for heavy-duty industrial and workshop fabrication. With a powerful 3-phase DC motor and adjustable pulse frequency, it handles both MIG and pulse welding for a multitude of metal repairs. The robust steel housing, digital display, and advanced overload protection ensure ultimate operator safety. Wheel-mounted mobility and torch compatibility make it ideal for demanding environments.

Versatile Industrial Welding Solution

The Mogora Pulse MIG 500 DP is used extensively for automobile fabrication, repair, and comprehensive metalwork. With extra features like adjustable pulse frequency, high-efficiency fan cooling, and a separate wire feeder unit, it outshines alternatives in its class. The advantage lies in its strong arc current of 500 Amps and digital controls, delivering consistent, quality welds for applications requiring both power and finesse.

Mogora WRCP 1201 Thyro Saw Rectifier Welding Machine

Category: Welding Machine | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Arc Current	1200 Amps
Type	Thyro Saw Rectifier Welding Machine
Frequency	50 Hz
Voltage	415V
Usage	Industrial welding
Cooling Method	Air cooled
Weight	550Kg
Output Current	1200 Amps
Rod Diameter	2.3mm
Condition	New
Dimension (L*W*H)	1150*770*900mm
Function	Rectifier welding
Material	Metal
Panel Meters	Dual display
Phase	Three Phase
Enclosure Protection	IP23
Build	Heavy-duty construction
Front Panel	Finned for cooling
Control	Manual adjustment
Application	Submerged arc welding

Parameter	Value
Handles	Lifting hooks
Color	Blue color housing
Mounting	Portable wheels

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Access the supreme efficiency of the Mogora WRCP 1201 Thyro Saw Rectifier Welding Machine, famed for its celebrated performance in industrial settings. Personalise your welding parameters with manual control and procure this heavy-duty, three-phase marvel for high-demand submerged arc welding. Enjoy robust construction with blue color housing, mounted on portable wheels with lifting hooks for effortless mobility. The dual panel meters, IP23 enclosure, air-cooled system, and finned front panel ensure optimal cooling and safety. Engineered for 1200 Amps and built to precise dimensions, it is the quintessential choice for experts sourcing reliability and power in India.

Engineered Material and Industrial Application

This Thyro Saw Rectifier Welding Machine is crafted from supreme-grade metal, ensuring durability and longevity in challenging environments. Specially designed for industrial-scale submerged arc welding, it is suited for continuous plant operation. To use, connect to a 415V power source, adjust settings using manual controls, and monitor via the dual digital display. Its robust build, portability, and advanced cooling make it indispensable for precise, consistent heavy-duty welding applications.

ANU ARC SALES & SERVICES — For Welding Precision

Mogora WT3510 MIG Welding Torch

Category: MIG Welding Torch | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Power Source	Gas Cooled
Welding	MIG
Equipment Type	MIG Welding Torch
Type	Welding torch
Material	SS
Rated Current	400Amps
Color	Blue
Fuel gas type	LPG
Torch cooling	Gas cooled
Duty cycle	60%
Wire feed compatible	Yes
Model	WT3510
Ergonomic handle	Yes
Flexible cable	Included

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

Get it now - the Supreme Mogora WT3510 MIG Welding Torch, engineered for top-tier performance in industrial tasks. With a wondrous 60% duty cycle, this model supports LPG fuel gas, ensuring consistent results. The gas-cooled WT3510 features a durable stainless steel build and an ergonomic handle for enhanced comfort. Buy online and take advantage of this offer to receive flexible cable and wire feed compatibility. Designed for MIG welding at 400 Amps, this blue torch is the preferred choice for suppliers and traders across India seeking reliable equipment.

Special Features & Robust Material Build

The Mogora WT3510 MIG Welding Torch features an ergonomic handle and a highly flexible cable, prioritizing user comfort during extended tasks. Constructed from robust stainless steel (SS), the torch is optimized for heavy-duty MIG welding applications. Gas-cooled for enhanced longevity and efficiency, this equipment offers seamless wire feed compatibility, making it suitable for a wide range of industrial welding scenarios. This torch is a top pick for professionals who demand reliability and supreme material performance.

Mogora RMC203 PRO Controller

Category: Batching Controller | Price: On request | GST: 23AKGPK2852C1ZM

Specifications

Parameter	Value
Display	7-inch TFT Touch Screen
Usage & Applications	Industrial robot programming and control
Sensor Type	Compatible with various robotic sensors
Features	User-friendly interface, teach pendant included, high reliability
Protection Level	Over-current & short-circuit protection
Switch Type	Emergency stop switch on pendant
Output	Relay/Transistor Outputs
Installation Type	Panel/Wall Mount
Connectivity Type	Ethernet, USB, RS232/RS485
IP Rating	IP20
Mounting Type	Panel/Wall Mounted
Phase	Single Phase
Frequency	50/60 Hz
Current	1.5A
Product Type	RMC203 PRO Controller
Operating Temperature	0C to 50C
Working Temperature	0C to 50C
Input	Digital/Analog
Application	Industrial automation, robotic arm control
Supply Voltage	AC 220V
Accuracy	High-precision control
Dimension (L*W*H)	350 mm x 250 mm x 150 mm
Weight	3.5 kg
Cooling System	Built-in cooling fan
Remote Control	Supported via network
Enclosure Material	Industrial-grade ABS and metal

Parameter	Value
Data Storage	Internal memory and external USB support
Control Axis	Up to 6 axes
Response Time	10 ms
Safety Features	Emergency stop button, safety interlocks
Programming Language	Support for multiple robotic languages

Trade Information

Minimum Order Quantity	1 Unit
Payment Terms	Cash in Advance (CID)
Supply Ability	10 Units Per Month
Delivery Time	5-7 Days
Main Domestic Market	All India

Product Overview

The Mogora RMC203 PRO Controller is your gateway to world-class automation, boasting crowning features and peerless precision. This exclusive, new release is ending soon-don't miss your chance to revolutionize your operations! Experience up to 6 control axes, robust internal and USB data storage, and support for multiple programming languages. An industrial-grade build with state-of-the-art safety mechanisms ensures reliability and durability in demanding environments. Ideal for industrial automation and robotic arm control, this controller delivers high-precision performance with a user-friendly interface and remote access-all in one compact powerhouse.

Versatile Excellence for Industrial Automation

The Mogora RMC203 PRO Controller sets the standard for modern industrial automation, finding its niche in diverse commercial environments. Its user-friendly design, emergency stop switch, and high-precision response make it perfect for robotic arm control, complex assembly lines, and process management. With advanced connectivity options and compatibility with multiple sensor types, this programmable marvel streamline operations in manufacturing, automation labs, and factory setups across India, supporting organizations that demand efficiency and safety.
